The aim of the Sustainable Development and Engineering Special Session of the ICACIE2020 conference is to provide a common platform for researchers, scientists, engineers as well as scholars from all over the region and other parts of the world to present research outcomes in their relevant fields and to bring up a conducive environment to exchanging ideas and information. The ICACIE conference will also be an opportunity to bridge the gap between Information Technology and hardcore engineering encompassing fields of electrical and electronics, mechanical and civil engineering. All full paper submissions will be peer reviewed and evaluated based on originality, technical and/or research depth, accuracy and relevance. Research themes for the ICACIE2020 Engineering sub session include, but are not limited to:

SUSTAINABLE DEVELOPMENT AND ENGINEERING

- Electrical Machines, Automation, Instrumentation and Control Engineering
- Smart Grid, Renewable Energy and Storage Technologies
- Power Systems and Power Electronics
- Opto-electronics, Biomedical devices and applications
- Signal processing and Communications Theory
- Water Systems Engineering
- Fluid mechanics
- Structural and Civil Engineering
- Geotechnical Engineering
- Engineering Geology
- Construction Material
- Building Energy Management
- Waste Management
- Environmental Risk Management
- Traffic Engineering
- Mechanical System Design
- Power Hydraulic and Pneumatic Engineering
- Refrigeration Systems Engineering
- Health and safety Engineering

CALL FOR POSTER PRESENTATIONS

The Special Session invites participants for poster submission for the conference. Accepted posters will be displayed in the conference venue in a designated poster session providing presenters with an opportunity to engage in discussion with other attendees around their research and indexing in the conference proceedings of abstracts.
